

# Software and Network Support

## Associate in Applied Science Degree

### Why Software and Network Support?

The explosion of computer use in today's society has created a high demand for specialists to provide technical and end-user support to people using computer systems. The CIS: Programming and User Support degree program at Bay College will equip students to select, install, use, and help others to use computer systems and software. Students who wish to learn about current computer technologies and have an interest in learning about computer applications, cybersecurity, basic programming, and web development should explore this degree program. A graduate of the program will have the potential for employment in a high demand, high paying industry where the need for technical specialists is stronger than ever and continues to grow.

### Why Bay College?

The [Computer Information Systems Software and Network Support program](#) at Bay College emphasizes problem solving using current software packages, hardware configurations, operating systems, and networks. Are you interested in developing your own software applications? Do you want to support and train users as they learn new technologies? Do you like working with hardware and configuring networks? Or maybe you would just like to brush up on your software skills. We offer the curriculum to support all of these things and more. Browse our programs and courses to see what we have to offer!

### Beyond Bay College
