

Emergency Medical Technician Certificate

Why Emergency Medical Technician?

An Emergency Medical Technician determines the nature and extent of their patient's condition and looks for any pre-existing conditions that might exist. Following local protocol and medical direction, the Emergency Medical Technician will give appropriate emergency medical care and transport the patient when needed. This medical care includes managing respiratory, cardiac, trauma, and many medical emergencies. To assist the student with reaching this goal, this program combines general education with program specific lecture, lab, and clinical courses.

Why Bay College?

The [Emergency Medical Technician certificate program](#) at Bay College prepares a well-educated Basic Emergency Medical Technician, providing education beyond the Basic Emergency Medical Technician minimum requirements. Bay de Noc Community College offers courses in the Emergency Medical Technician-Basic Certificate Program each fall. Bay de Noc Community College is one of few colleges that offer the Emergency Medical Technician-Basic program for academic credit, enabling students to continue into the AAS-Paramedic Program. The Emergency Medical Technician program is designed to promote career mobility and offer qualified students alternative educational tracks according to their career goals. Successful completion of the Bay de Noc Community College EMT program will prepare the students to become competent entry-level Emergency Medical Technicians, ready for employment and further education.

Beyond Bay College

Students interested in transferring to a four-year institution to obtain a bachelor's degree or higher may find opportunities in the following areas of study:

- Paramedic
- Firefighter
- Law Enforcement Officer
- Emergency Management Directors
